

AMENDMENTS TO THE SPECIFICATION

The paragraph following the **Description of the drawing** section on page 1 has been amended as follows.

This new Marguerite Daisy plant is illustrated by the accompanying photographic drawing which shows blooms, buds and foliage of the plant in full color, the color shown being as true as can be reasonably obtained by conventional photographic procedures (FIG. 2). The depicted plant is of the same age as disclosed in the ~~botanical~~ botanical description. The dimensions of the florets of this new Marguerite Daisy are illustrated more precisely by the accompanying photographic drawing which shows the florets next to a ruler (FIG. 1).

The third section starting at line 16 on page 5 has been amended as follows:

**Gynoecium**

**Gynoecium:**

Pistil number	: one per floret (ray florets only)
Pistil length	: about 2mm
Style color	: yellow green 144D
Style length	: about 2mm
Stigma color	: yellow orange 14A
Stigma shape	: bilobed
Ovary color	: 144C

The first sentence on page 6 has been amended as follows:

Comparison with 'Sugar Button's and SG30032 'Argydowitis' on characteristics in which the new plant differs:

The table on page 6 has been amended as follows:

	<b>'Sugar Button' (PP 11,980)</b>	<b>'Argydowitis'</b>
Plant height	19-22 cm	25-28 cm
Plant habit	compact	upright
Flower diameter	3.0-3.5 <u>cm</u>	4.2-5.0 cm
Foilage color	137A-137B	133A-139A
